

Paddle Sports Design - Rowing

Instructions for designers

Design possibilities and restrictions

When creating a design you should have in mind from the beginning for which boat model are you aiming.

These parameters will inform what is available and what is permitted:

1. Model - Know the model you're aiming for and its shape

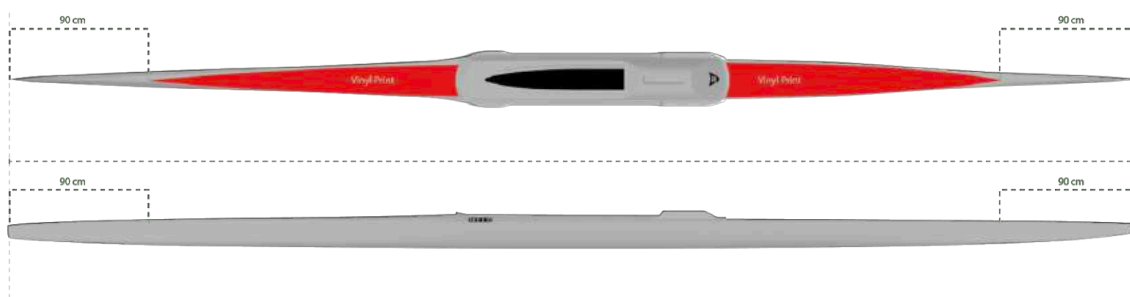

2. Construction SCS

- . a) Up to 4 colors.
- . b) Clear carbon is not available.
- . c) Printed vinyl, only available in deck. The areas available are defined in one of the attachments .

3. What to consider when ordering a design:

- . a) What model to design for;
- . b) Choose colors from the available palette as listed on the below template;

- . c) Consider colors for stickers, where available;
- . d) The Cockpit can only have one color. Designs not available in this area;
- . e) Avoid metallic colors. Avoid gradients unless it will be printed vinyl and available only if apply in the deck;
- . f) The first 90 cm and the last 90 can only have one color, as in the picture:

Deck _____

Hull _____

Nelo Logos _____

1015	Cream	5015	Blue
1016	Yellow	85	Blue Cinco
Y5	Yellow Cinco	5012	Light Blue
1023	Dark Yellow	G5	Green Cinco
2004	Orange	6018	Light Green
3003	Bordeaux	6019	Green "Hungary"
3020	Red	6029	Green "Portugal"
R5	Red Cinco	6020	Dark Green
4006	Purple	7004	Gray Reflect
5005	Blue "Italy"	9004	Black
5013	Dark Blue	9016	White

Mentions the colors with the RAL code that you want in your drawing.

Custom designs

The values for the custom designs follow this table:

	Basic	Brilliant	Expert
Sale price (tax included)	€125	€185	€370
Expected work hours	2	3	6

Info for Customers how to order a boat

Every boat design should respect the following rules:

- The first 90 cm and the last 90 cm should be of a single color;
- Images, illustrations, patterns or other detailed features are only available on the deck;
- Shapes on the hull must be at least 3 cm wide;
- You be asked to provide the vector files like EPS or AI, and image JPG with colors,

Boatdesigns

These are the same file you need to upload in the nelo area when you ordering the new boat.

Designs with complex Paintings and low resistance Varnish

- paintings on the hull can't be repaired, so the best option is always to have the hull in gel coat;
- paintings only in the deck;
- more problems with temperatures (print through);
- less warranty time;

- not choosing the colors that are in our GelCoat option list makes it very hard to repair the boat in the future.

What we tell the customers when they get a varnished boat:

We are very proud on having produced this amazing piece and we hope it meets your expectations.

For such special designs we work with the best and treat it like a work of art. We are sure that you will feel the same.

To be able to do it we used the finest materials and some special techniques, that require extra care in handling and storing so it retains its looks for long.

TAKE EXTRA CARE OF YOUR BOAT:

- *Don't leave in the sun for long periods of time;*
- *Don't apply solvents;*
- *Avoid contact with abrasives;*
- *Have extra care when handling not to bump it hard;*
- *Always dry it prior to storage;*
- *Use a cover whenever possible;*
- *Do not tie it down too tight.*
